

Professional care

We are committed to providing special care, in compliance with IATA's Live Animals Regulations (LAR). We ensure a stress-free journey for the animals by keeping the transit time to minimum as they transfer from origin airport to the final destination.

Pets

We know how important your pet is to you. We ensure special care and treatment are offered all the way from origin airport to the destination. While pets are in transit at state-of-the-art live animal centre, friendly and fully-trained staff in transit provide individual care and food to your pets.

Petrelocation.sg provide fast and safe way of transporting animals. Rely on our trained Animal Team: handling, care and transportation processes are always tailored to the individual and special needs of each pet(s) and owners.

For bookings and enquiries,
email fly@petrelocation.sg

Tranquilizing

We do not recommend tranquilizing or sedating animals while they fly.. For smooth and fast delivery at destination, we will ensure that there is someone to meet your precious pet(s) at the airport of destination.

Pet Containers

We provides a range of pet containers (IATA LAR Container Requirement 1) in various sizes. We recommend purchasing the container months before travel to start training your pets in it. By placing familiar bedding, toys or treats inside, your pet will become accustomed to it.

Expert Animal Handling

Our solution encompasses proven experience in handling and care for LIVE ANIMALS. All animals, transported are constantly supervised for their safety, comfort and security. While animal welfare is our first priority, we also ensures that the often complex requirements of regulatory authorities are met to avoid unnecessary delays at any point.
